## General Description

The Century Series controllers are designed for precise control performance at the most reasonable cost. Available in five DIN sizes, these instruments are recognized for their solid reliability and ease-of-use. This Series features dual displays, autotuning, PID algorithm, field-selectable °C/°F, reverse or direct action and a full range of temperature alarms.

## Features

- ☆ Heat/Cool Control
- ☆ Standard autotuning
- ☆ Heater and loop break alarm
- ☆ Numerous control outputs
- ☆ Field-configurable thermocouples

### Heat/Cool Control

The Heat/Cool PID control features heat and cool outputs for use where process-generated heat exists. This allows the input of overlap or deadband settings which contribute to energy savings. (Not available on REX-C100)

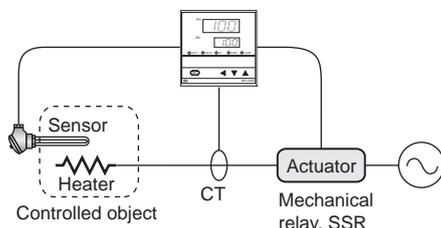

### Heater Break Alarm (Optional)

The heater break alarm (HBA) detects a fault in heating or cooling circuit and displays actual amperage on the front panel. If the measured value becomes lower than the preset value, the alarm is activated.

The HBA function requires a current detector for measuring and monitoring the current load.

HBA for three phase is available. Contact RKC for details.

- Current transformer : CTL-6-P-N (0 to 30A),  
 CTL-12-S56-10L-N (0 to 100A)

### Loop Break Alarm (Optional)

The control loop break alarm (LBA) monitors and protects an entire temperature control system. The LBA detects heater breaks, thermocouple or RTD failures, short circuits, or the failure of an operating device such as a mechanical or solid state relay.

When the PID computed value reaches 100% and the temperature does not respond in a set time, the loop break alarm is activated. Conversely, when the PID value reaches 0% and the temperature does not respond accordingly, the loop break alarm is turned on. In this example, the LBA uses reverse action to control heat. For cool control, the LBA action is reversed and becomes direct. LBA deadband is available to suppress the influence of external disturbances.

### Standard Features

The Century Series offers full PID Control, autotuning on demand, °C/°F, Reverse or Direct action, PV Bias, anti-reset windup and operator lock-out function. Twelve different field-configurable thermocouple types inputs, RTD, DC milliamp or voltage inputs as well as relay, voltage pulse, 4-20 mA and triac trigger outputs are available.

## Specifications

### Input

#### Input (Universal input)

- a) Thermocouple : K, J, R, S, B, E, T, N (JIS/IEC), PLII (NBS)  
W5Re/W26Re (ASTM), U, L (DIN)
  - Influence of external resistance : Approx. 0.35 $\mu$ V/ $\Omega$
  - Input break action : Up-scale
- b) RTD : Pt100 (JIS/IEC), JPt100 (JIS)
  - Influence of input lead resistance : Approx. 0.01[%/ $\Omega$ ] of reading  
• Maximum 10 $\Omega$  per wire
  - Input break action : Up-scale
- c) DC voltage : 0 to 5V, 1 to 5V (0.0 to 100.0% fixed)
  - Input break action : Down-scale
- d) DC current : 0 to 20mA, 4 to 20mA (0.0 to 100.0% fixed)
  - Input break action : Down-scale

#### Sampling Time

0.5 sec

### Performance

#### Measuring Accuracy

- a) Thermocouple
  - $\pm$ (0.5% of reading + 1 digit) or  $\pm$ 3°C (6°F) whichever is larger
  - R, S inputs:  $\pm$ 6°C (12°F) between 0 and 399°C (0 and 799°F)
  - Accuracy is not guaranteed between 0 and 399°C (0 and 799°F)

for

- type B.
- b) RTD
  - $\pm$ (0.5% of reading + 1 digit) or  $\pm$ 0.8°C (1.6°F) whichever is larger
- c) DC voltage and DC current
  - $\pm$ (0.5% of span + 1 digit)

#### Insulation Resistance

More than 20M $\Omega$  (500V DC) between measured and ground terminals  
More than 20M $\Omega$  (500V DC) between power and ground terminals

#### Dielectric Strength

1000V AC for one minute between measured and ground terminals  
1500V AC for one minute between power and ground terminals

### Control

#### Control Method

- a) PID control with autotuning
  - Available for reverse and direct action (Specify when ordering.)
- b) Heat/Cool PID control with autotuning (Not available on REX-C100)
  - Available for air and water cooling type (Specify when ordering.)

#### Major Setting Range

Setting range : Same as input range.  
Heat-side proportional band: 1 to span or 0.1 to span  
(ON/OFF action when P=0)  
• Differential gap at ON/OFF action is 2°C (°F) as standard  
(Factory set value)  
Cool-side proportional band: 0 to 1000% of heat-side proportional band  
(Heat/Cool ON/OFF action when Pc=0)  
Integral time : 0 to 3600sec. (PD action when I=0)  
Derivative time : 0 to 3600sec. (PI action when D=0)  
Anti-reset windup (ARW) : 1 to 100% of heat-side proportional band  
Deadband/overlap : -10 to 10°C (°F) or -10.0 to 10.0°C (°F)  
Proportional cycle : 1 to 100 sec.

#### Control Output

Relay output : Form C contact, 250V AC 3A (resistive load)  
(Form A contact : REX-C100)  
Voltage pulse output : 0/12V DC  
(Load resistance : More than 600 $\Omega$ )  
Current output : 4 to 20mA DC  
(Load resistance : Less than 600 $\Omega$ )  
Triac trigger output : Zero-cross method for medium capacity  
triac drive (less than 100A)  
• Not available on Heat/Cool PID type.

### Alarms

(Optional)

#### Temperature Alarm

- a) Number of alarm : 2 points (Maximum)
- b) Alarm action : Deviation High, Low, High/Low, Band  
Process High, Low
- c) Alarm differential gap : 2°C (°F) or 2.0°C (°F) as standard.

#### Heater Break Alarm (For single phase)

- a) Number of inputs : 1point
- b) CT type : CTL-6-P-N(30A), CTL-12-S56-10L-N(100A)
- c) Display range : 0.0 to 100.0A
- d) Accuracy :  $\pm$  5% of input value or 2A  
(whichever is larger)

• Output from Alarm 2 terminal.

#### Control Loop Break Alarm (LBA)

- a) LBA time setting : 0 to 7200 sec.
- b) LBA deadband : 0 to 999 °C[°F] or 100% of span  
(OFF when LBA deadband = 0)

• Not available for triac trigger output type.  
• Not available for heat/cool type.

#### Alarm Output

Relay output, Form A contact 250V AC 1A (resistive load)

### General Specifications

#### Supply Voltage

- a) 85 to 264V AC (Including supply voltage variation)  
[Rating : 100 to 240V AC] (50/60Hz common)
- b) 21.6 to 26.4V AC (Including supply voltage variation)  
[Rating : 24V AC] (50/60Hz common)
- c) 21.6 to 26.4V DC (Ripple rate 10% p-p or less)  
[Rating : 24V DC]

#### Power Consumption

Less than 17VA for standard AC type  
Less than 7.5VA for 24V AC type  
Less than 200mA for 24V DC type

#### Power Failure Effect

A power failure of 20msec or less will not affected the control action.  
If power failure of more than 20msec occurs, controller will restart.

**Operating Environment** : 0 to 50°C [32 to 122°F] , 45 to 85% RH

**Memory Backup** : Backed up by non-volatile memory.

#### Net Weight

REX-C100 : Approx. 170g  
REX-C400 : Approx. 260g  
REX-C410 : Approx. 260g  
REX-C700 : Approx. 250g  
REX-C900 : Approx. 340g

#### External Dimensions (W x H x D)

REX-C100 : 48 x 48 x 100mm  
REX-C400 : 48 x 96 x 100mm  
REX-C410 : 96 x 48 x 100mm  
REX-C700 : 72 x 72 x 100mm  
REX-C900 : 96 x 96 x 100mm

### Compliance with Standards (Optional)

- CE Mark
- UL/cUL Recognized

• Triac trigger output type and triac output are not CE Mark or UL/cUL Recognized.

# Digital Temperature Controller CENTURY Series
