# 4CH temperature controller packed in one compact module

## ● Compact

Width 30mm, depth 85mm (connector type : 76.9mm) compact design with 4ch control type.

Temperature Control Module : Z-TIO  
(4ch or 2ch control)

(Terminal type) (Connector type)

Digital Input/Output Module : Z-DIO  
(8 inputs and 8 outputs)

(Terminal type) (Connector type)

## ● 4 CT inputs and 4ch controls in one module

4ch Z-TIO module can have 4 CT (Current transformer) inputs.

CT input connector

CT (Current transformer)  
Input Module : Z-CT  
(12 inputs)

Communication Extension  
Module : Z-COM  
(High-speed communication gateway)

## ● Ultra compact - requires substantially less panel space

# Flexible temperature control system configuration

## ● Distributed installation

Modules can be remotely distributed by connecting them via RS-485 communication. Up to 16 Z-TIO (64 CH) and 16 Z-DIO (128 DI/DOs) modules can be connected to one serial communication line by distributed installation.

The maximum number of modules connected by distributed installation is 31 modules.

## ● High-speed communication with large systems, Program-less connection to PLCs

Z-COM module can manage data from connected control modules via high-speed bus connection. MAPMAN program-less connection to PLC is also available.

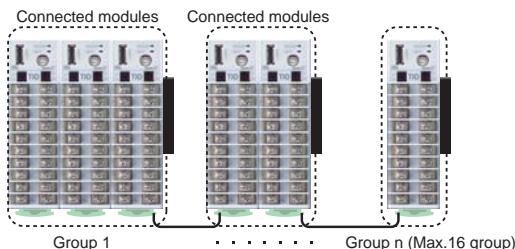

Program-less connectable PLCs: Mitsubishi Electric MELSEC Series

# Advanced functions enhance multi-loop control

## ● Temperature uniformity at ramp-up (Auto-temperature rise function)

The Auto-temperature rise function controls the rate of temperature rise uniformly across all the channels in a specified group. The SRZ system has the ability to have multiple groups within each system. This uniform controlled temperature rise will suppress local overheating and mechanical distortion in the tools, contributing to higher product quality.

## ● Multi-loop profile control (Output ratio distribution function)

This function enables one master loop to distribute its output value to multiple outputs of Z-DIO modules. Bias and ratio can be set for each output independently.

A maximum of 187 distribution outputs from one control loop is possible when Z-DIOs and Z-TIOs are used for output ratio distribution.

- Output ratio distribution function works via back plane connected modules.
- Distribution output from DIO module becomes open collector output or relay contact output.

## ● Automatic SV setting on heater break alarm and heater over current alarm

Set values of Heater break alarm (HBA) and heater over current alarm are automatically set by pressing a front-mounted push button when a heater is on.

This function is also available for three-phase heater break alarm.

- HBA function of Z-CT module is designed only for time proportional control (On/Off output.) Phase control (continuous output) is not available.
- The CT input monitor value indicates the effective value when the heater break alarm function is enabled and output is 100% (heater ON) or 0% (heater OFF.)

## ● Peak current suppression

Peak current suppression minimizes the capacity of electrical materials such as power supply equipments, switchboards, power lines, and breakers since this function makes the timing of control output on each channel separate so that the current consumption of the channel with maximum heater capacity is detected as maximum current consumption.

## ● External disturbance suppression with autotuning (EDS)

EDS with autotuning calculates optimum settings to suppress control disturbance caused by external factors. The function is activated by a DI signal to adjust control output (feed-forward) to compensate for the disturbance.

It is suitable for an application in which external disturbance can be predicted, such as wafer-in/out in semiconductor manufacturing equipment, and during injection in injection molding machine.

# Communication

## Programless connection to PLCs

(Temperature control module with PLC communication : Z-TIO-C/D)

## Open Network Connectivity

### MECHATROLINK

COM-MY

### Ethernet/IP

COM-ML

#### COM-JH

DeviceNet Communication  
Protocol: DeviceNet  
Connection method:  
Multi-drop connection, T-branch connection  
[Terminating resistor (121Ω, 1/4W) is necessary]  
Communication speed: 125 kbps, 250 kbps, 500 kbps  
Error control: CRC error  
Node address (MAC ID) duplication check  
Max number of connection nodes: 64 (including master)  
**Communication to SRZ**  
Connection module : Z-TIO-A/B, Z-DIO  
Maximum connection  
Total module 31 modules  
Same function module : 16 modules  
Communication method: RS-485  
Protocol : Modbus-RTU  
**General Specifications**  
Power supply voltage: 24V DC  
Current consumption: Less than 80mA  
Rush current : Less than 12A  
Weight : Open-style connector type : 120g  
Micro-style connector type : 200g  
External dimensions: 30 x125 x 110mm (W x H x D)

#### COM-JL

Ethernet communication  
Physical layer:  
Ethernet  
10BASE-T/100BASE-TX automatic recognition  
Application layer: Modbus/TCP  
Communication data: Based on Modbus message format  
Connector type: RJ-45  
**Communication to SRZ**  
Connection module : Z-TIO-A/B, Z-DIO  
Maximum connection  
Total module 31 modules  
Same function module : 16 modules  
Communication method: Based on RS-485  
Protocol : Modbus-RTU  
**General Specifications**  
Power supply voltage: 24V DC  
Current consumption: Less than 110mA  
Weight : Approx. 180g  
External dimensions: 30 x125 x 110mm (W x H x D)

#### COM-JC

CC-Link communication  
Protocol: CC-Link Ver.1.10/Ver.2.00  
Communication speed: 156 kbps, 625 kbps, 2.5 Mbps  
5 Mbps, 10 Mbps  
Station number: 1 to 61 (4 stations occupied 1 time,  
4 stations occupied 2 times)  
1 to 64 (1 stations occupied 1 time)  
Connection cable: CC-Link dedicated cable Ver.1.10  
**Communication to SRZ**  
Connection module : Z-TIO-A/B,Z-DIO  
Maximum connection  
Total module 31 modules  
Same function module : 16 modules  
Communication method: RS-485  
Protocol : Modbus-RTU  
**General Specifications**  
Power supply voltage: 24V DC  
Current consumption: Less than 120mA  
Rush current : Less than 12A  
Weight : 220g  
External dimensions: 30 x125 x 110mm (W x H x D)

#### COM-ML

Ethernet/IP communication  
Physical layer:  
Ethernet  
10BASE-T/100BASE-TX automatic recognition  
Application layer: Ethernet/IP  
Correspondence message: I/O message,Explicit message  
Connector type: RJ-45  
**Communication to SRZ**  
Connection module : Z-TIO-A/B, Z-DIO  
Maximum connection  
Total module 31 modules  
Same function module : 16 modules  
\* Multi-drop connection : Up to SRZ 16 units  
Communication method: RS-422A/485  
Protocol : Modbus-RTU  
RKC communication (ANSI X3.28-1976)  
**General Specifications**  
Power supply voltage: 24V DC  
Current consumption: Less than 80mA  
Rush current : Less than 12A  
Weight : 130g  
External dimensions: 30 x100 x 76.9mm (W x H x D)

#### COM-MY

MECHATROLINK communication  
Protocol: MECHATROLINK-II /I  
Communication speed: 10M bps(II), 4M bps (I)  
Number of stations: 30(II), 15(I)  
Communication method: Master/slave synchronous  
Setting size: 17 bytes/32 bytes(Only II)  
Transmission insulation: Transformer insulation  
ASIC: JL-052  
Type of station: Slave station  
Station address: 60h to 7Fh  
**Communication to SRZ**  
Connection module : Z-TIO-A/B, Z-DIO  
Maximum connection  
Total module 31 modules  
Same function module : 16 modules  
\* Multi-drop connection : Up to SRZ 16 units  
Communication method: RS-422A/485  
Protocol : Modbus-RTU  
RKC communication (ANSI X3.28-1976)  
**General Specifications**  
Power supply voltage: 24V DC  
Current consumption: Less than 80mA  
Rush current : Less than 12A  
Weight : 120g  
External dimensions: 30 x100 x 76.9mm (W x H x D)

# Display Unit

## Compact Setting Display OP10

This DIN rail mounted compact display and setting unit is suitable for on-site operation change and monitoring.

### External Dimension

Unit : mm

- ◆ Monitor item
  - Measured value (PV)
  - Set value (SV)
  - Heat-side output value (MV)
  - Cool-side output value (Mc)
  - Event 1 status (A1)
  - Event 2 status (A2)
- ◆ Setting item
  - Autotuning
  - Event 1 (A1)
  - Event 2 (A2)
  - Heat-side proportional band (P)
  - Heat-side integral time (I)
  - Heat-side derivative time (D)
  - Cool-side proportional band (Pc)
  - PV bias (Pb)

- ◆ Setting by MODBUS register address  
Any Modbus register address can be specified to set or display data. This is used to set or display data that is not included within the OP10 parameter.

### Socket (Sold separately) External Dimensions

DIN rail mounting socket type  
Model : ATC180041  
(Matsushita Denko product)

### OP10 Specifications

Display: LCD display, 4-digitX2 (Green/Orange)  
Communication (Communication to SRZ)  
a) Communication method: Based on EIA RS-485  
b) Communication speed: 4800bps, 9600bps, 19200bps, 38400bps  
c) Bit format:  
Start bit: 1, Data bit: 8, Parity bit: None, Stop bit: 1  
d) Protocol: Modbus: Modbus-RTU  
Maximum connection: 16 modules  
Connection module  
Z-TIO module : 16 modules  
Z-COM-A module : 16 modules (However, up to 99 channels)  
The OP10 can be connected to a Z-TIO module and a Z-DIO module, although it cannot be used to set or display data of the Z-DIO module.  
General specifications  
Power supply voltage :  
a) 100 to 240V AC (Rating), 50/60Hz  
b) 24V AC (Rating), 50/60Hz  
c) 24V DC (Rating)  
Power consumption  
4VA max. (at 100V AC) 7VA max. (at 240V AC)  
4VA max. (at 24V AC) 100mA max (at 24V DC)  
Compliance with standard: cUL, CE marking, C-Tick  
Ambient temperature: 0 to 50°C  
Ambient humidity: 45 to 85% RH  
Waterproof/Dustproof: IP66 (Option)  
Weight: Approx 120g

### Rear terminal socket type

Model : AT78051  
(Matsushita Denko product)

## Communication with a PC via USB port (Loader communication)

### Easy parameter setup via USB loader port with Win-UCI software (Loader communication)

The SRZ module has a standard loader port on the front panel to connect to a PC USB port via COM-K2 (USB communication converter). Using Win-UCI software on the PC, parameter settings can be easily saved on the PC in CSV format, and the same parameter settings are easily copied to other SRZ modules.

### Easy data monitoring and logging with Win-UCI software

The Win-UCI software enables data monitoring and logging on the PC via communication terminals of SRZ. When SRZ communication terminals are connected to COM-K2 (see the diagram below), the USB port can be used on the PC side. Monitor and log data can be exported as an electronic file in CSV format.

• Win-UCI for SRZ is coming soon on the RKC Instrument website ([www.rkcinst.com](http://www.rkcinst.com)).

The Loader port is only for parameter setup

# Specifications

## Temperature Control Module (Z-TIO)

### Input

#### Universal input

- Number of inputs  
4 or 2 channel (Isolated between inputs)
- Input  
a) Temperature, Current, Low voltage input group  
Thermocouple : K, J, E, T, R, S, B, N (JIS/IEC)  
PLII (NBS), W5Re/W26Re (ASTM)  
RTD : Pt100 (JIS/IEC), JPt100 (JIS)  
• 3-wire system  
Low voltage (Input impedance : More than 1MΩ)  
0 to 1V DC, 0 to 100mV, 0 to 10mV DC  
Current (Input impedance : 50Ω)  
4 to 20mA, 0 to 20mA
- b) High voltage input group  
High voltage (Input impedance : 1MΩ)  
-1 to +1V DC, 0 to 5V DC, 1 to 5V DC, 0 to 10V DC  
• Available for feedback resistance input
- Sampling time : 0.25sec  
Influence of external resistance : 0.125μV/Ω (Thermocouple input)  
Influence of lead resistance : 0.02% of reading/Ω (RTD input)  
• Maximum 10Ω per wire
- Input break action  
a) Thermocouple input : Up-scale/Down-scale (Selectable)  
b) RTD input : Up-scale  
c) Low voltage input : Up-scale/Down-scale (Selectable)  
d) Current input : Value around 0mA  
e) High voltage input : Value around 0V
- Input short action : Down-scale (RTD input)  
Input digital filter : 0.1 to 100.0 sec. (OFF when 0 is set.)  
PV bias : -span to +span  
PV ratio : 0.500 to 1.500

### Control

- a) Brilliant II PID control  
• Direct action/Reverse action is selectable
- b) Brilliant II PID control (Heat/Cool type)
- c) Position proportioning control without feedback resistance  
• a), b), c) is selectable  
• With auto-tuning and start-up tuning (Except for position proportioning control)
- a) Proportional band :  
Temperature input : 0 to input span (°C, °F)  
Voltage/Current input : 0.0 to 1000.0% of input span  
• Differential gap at ON/OFF control (High/Low individual setting) :  
Temperature input : 0 to input span (°C, °F)  
Voltage/Current input : 0.0 to 100.0% of input span
- b) Integral time : 0 to 3600 sec or 0.0 to 1999.9 sec (selectable)
- c) Derivative time : 0 to 3600 sec or 0.0 to 1999.9 sec (selectable)
- d) Cool side proportional band :  
Temperature input : 1(0.1, 0.01) to input span (°C, °F)  
Voltage/Current input : 0.1 to 1000.0% of input span
- e) Cool side Integral time :  
0 to 3600 sec or 0.0 to 1999.9 sec (selectable)
- f) Cool side Derivative time :  
0 to 3600 sec or 0.0 to 1999.9 sec (selectable)
- g) Overlap/Deadband  
Temperature input : -span to +span (°C, °F)  
Voltage/Current input : -100.0 to +100.0% of input span
- h) Control response : Slow, Medium, Fast
- i) Ramp-to-setpoint : 0 to span per Time  
(Time is settable between 1 and 3600 sec)  
Up/Down individual setting
- j) Output limiter : -5.0 to +105.0% (High/Low individual setting)
- k) Output change rate limiter : 0.0 to 100.0%/sec  
(Up/Down individual setting)
- l) Proportional cycle time : 0.1 to 100.0 sec
- m) Cool side proportional cycle time : 0.1 to 100.0 sec
- n) Manual reset : -100.0 to +100.0%
- o) Output at Control Stop mode : -5.0 to +105.0%  
(Heat side/Cool side individual setting)

### Performance

| Input                  | Input Range                    | Accuracy                  |
|------------------------|--------------------------------|---------------------------|
| K, J, T,<br>PLII, E    | Less than -100°C (-148°F)      | ±2.0°C (±3.6°F)           |
|                        | -100 to +500°C (-148 to 932°F) | ±1.0°C (±1.8°F)           |
|                        | More than 500°C (932°F)        | ±(0.2% of reading+1digit) |
| N, S, R,<br>W5Re/W26Re | Less than 1000°C (1832°F)      | ±2.0°C (±3.6°F)           |
|                        | More than 1000°C (1832°F)      | ±(0.2% of reading+1digit) |
| B                      | Less than 400°C (752°F)        | ±70.0°C (±126°F)          |
|                        | 400 to 1000°C (752 to 1832°F)  | ±2.0°C (±3.6°F)           |
|                        | More than 1000°C (1832°F)      | ±(0.2% of reading+1digit) |
| Pt100,<br>JPt100       | Less than 200°C (392°F)        | ±0.4°C (±0.8°F)           |
|                        | More than 200°C (392°F)        | ±(0.2% of reading+1digit) |
| DC V, DC A             | ±0.2% of span                  |                           |
| FBR input              | ±1.0% of span +1digit          |                           |

- Cold junction temperature compensation error when close horizontal mounting  
±1.0°C (1.8°F) [Terminal type], ±2.0°C (3.6°F) [Connector type]

### Insulation resistance

More than 20MΩ (500V DC) between measured terminals and ground  
More than 20MΩ (500V DC) between power terminals and ground  
More than 20MΩ (500V DC) between measured and power terminals

### Dielectric voltage

750V AC for one minute between measured terminals and ground  
750V AC for one minute between power terminals and ground  
750V AC for one minute between measured and power terminals

### Output

Number of outputs : 4 points or 2 points

#### Output

- a) Relay contact output, Form a contact  
250V AC 3A (Resistive load)
- b) Voltage pulse output, 0/12V DC  
(Load resistance : More than 600Ω)  
• Power supply and output are not isolated

- c) Current output, 4 to 20mA DC, 0 to 20mA DC  
(Load resistance : Less than 600Ω)  
• Power supply and output are not isolated.
- d) Continuous voltage output  
1 to 5V, 0 to 5V DC, 1 to 5V DC, 0 to 10V DC  
(Load resistance : More than 1kΩ)  
• Power supply and output are not isolated.
- e) SSR (Triac) output, Rated current : 0.5A
- f) Open collector output (Sink type)  
Load current : Less than 100mA

### Event (Alarm) function

Number of events : Up to 4 points per channel

#### Event type

- Process high, Process low, Deviation high, Deviation low, Deviation high/low, Band, Set value high, Set value low, MV value high, MV value low, Cool side MV value high, Cool side MV value low, FBR value high, FBR value low, LBA (Control loop break alarm), Deviation high between channel, Deviation low between channel, Deviation high/low between channel, Deviation band between channel LBA, Temperature rise completion  
• LBA is assignable to event 4.
- Temperature rise completion is assignable to event 3.
- a) Hold/Re-hold action is configurable.  
• Valid for deviation/band/process alarm only.
- b) Energized/de-energized action is configurable.
- c) Delay timer : 0 to 1800sec
- d) Interlock (latch) function is configurable.

### Heater break alarm function

Number of alarms : 4 or 2 points (1 point per CT input)

CT type : CTL-6-P-N : 0 to 30A  
CTL-12-S56-10L-N : 0 to 100A

Input accuracy  
±(5% of input value + 1 digit) or 2A (whichever is larger)

### Communication function

Communication method : RS-485  
Communication speed : 4800bps, 9600bps, 19200bps, 38400bps

#### Protocol

- a) ANSI X3.28 sub-category 2.5B4 (RKC standard)
- b) MODBUS-RTU
- c) PLC special protocol (Mapman) : Z-TIO-C/D module  
Corresponding to MITSUBISHI MELSEC PLC series :  
1. A compatible, 1C frame (type 4).  
AnA/AnU common command (QR/QW)  
(ANA/QNA series, Q series)  
QnA compatible, 3C frame (type 4), command (0401/1401)  
(QnA/Q series) • ZR register only
2. A compatible, 1C frame (type 4).  
ACPU common command (WR/WW)  
(A series, FX2N, FX2NC series)

#### Bit format

- a) RKC standard protocol  
Start bit : 1, Data bit : 7 or 8,  
Parity bit : 1 (odd or even) or none, Stop bit : 1 or 2
- b) MODBUS protocol  
Start bit : 1, Data bit : 8 (binary or byte data),  
Parity bit : 1 (odd or even) or none, Stop bit : 1

#### Maximum connection

Z-TIO-A/B: 31 modules  
Z-TIO-C/D: 16 modules

### Multi-Memory Area (recipe)

Number of areas : 8 areas (recipes) per channel

#### Stored parameters

Set value (SV), Event set values 1 to 4, LBA time, LBA dead band, Proportional band, Integral time, Derivative time, Cool side proportional band, Cool side integral time, Cool side derivative time, Overlap/Deadband, Manual reset, Control response parameter, Ramp-to-setpoint (Up/Down), Soak time Linking area number

### Other functions

- a) Remote setpoint input
- b) Temperature ratio setting
- c) Cascade control mode
- d) Output ratio distribution function  
Function which distributes the control output value of the master channel to the Z-DIO/TIO module output.
- e) EDS function  
Function which suppresses overshoot and undershoot.
- f) Auto-temperature-rise with learning function  
Function which achieves temperature uniformity at ramp-up in the same control group while learning function calculates optimum parameter settings for this function.  
Up to 16 groups can be configured within modules which are connected each other by connectors on the base
- g) Peak current suppression function  
This function is effective for modules connected each other by connectors on the base  
• The peak current suppression function is performed in coupled modules.
- h) Master-slave Mode  
With this function, when a mode of Mode-master channel is changed, the mode of all slave channels (preset) will be also automatically changed. Modes can be selected among various mode function such as memory area (recipe).

# Specifications

## Digital Input/Output Module (Z-DIO)

### Digital Input

Number of inputs : 8 points  
• Isolated input (4 points/common)  
Input method  
Voltage contact input  
Open : Less than 5.0V, Close : More than 17.5V  
Contact current : Less than 3.0mA  
Allowable input voltage : Less than 26.4V DC  
Function : Interlock reset, RUN/STOP, Remote/Local,  
Auto/Manual, Memory area selection,  
External disturbance suppression  
Function allocation : See digital input allocation table

### Digital Output

Number of inputs : 8 points (4 points/common)  
Output signal  
a) Relay contact output, Form A Contact  
250V AC 1A, 30V DC 1A (Resistive load)  
b) Open collector output (Sink type)  
Allowable load current : Less than 100mA  
Load voltage : Less than 30V  
Minimum load : 0.5mA  
ON voltage : Less than 2.0V (at maximum load current)  
Leakage current at OFF : Less than 0.1mA  
Function :  
Event 1 output (CH1 to CH4), Event 2 output (CH1 to CH4)  
Event 3 output (CH1 to CH4), Event 4 output (CH1 to CH4)  
HBA output, Burn-out status output, Temperature rise  
completion output, Manual output  
Function allocation : See output allocation table

### Communication Function

Communication method : RS-485  
Communication speed : 4800bps, 9600bps, 19200bps, 38400bps  
Protocol  
a) ANSI X3.28 sub-category 2.5B4 (RKC standard)  
b) MODBUS-RTU  
Bit format  
a) RKC standard protocol  
Start bit : 1  
Data bit : 7 or 8  
Parity bit : 1 (odd or even) or none  
Stop bit : 1 or 2  
b) MODBUS protocol  
Start bit : 1  
Data bit : 8 (binary or byte data)  
Parity bit : none  
Stop bit : 1  
Maximum connection : 16 units

## Communication Extension Module (Z-COM)

### Communication Function

Communication method : RS-485/RS-422A  
Communication speed : 4800bps, 9600bps, 19200bps, 38400bps  
Protocol  
a) ANSI X3.28 sub-category 2.5B4 (RKC standard)  
b) MODBUS-RTU  
c) PLC special protocol (Mapman)  
Corresponding to PLC  
MITSUBISHI MELSEC series  
AnA/AnU common command (QR/QW)  
(ANA/QNA series, Q series)  
OMRON SYSMAC series  
C mode command (WD/RD/WE/RE)  
Bit format  
a) RKC standard protocol  
Start bit : 1  
Data bit : 7 or 8  
Parity bit : 1 (odd or even) or none  
Stop bit : 1 or 2  
b) MODBUS protocol  
Start bit : 1  
Data bit : 8 (binary or byte data)  
Parity bit : 1 (odd or even) or none  
Stop bit : 1  
c) PLC special protocol (Mapman)  
Start bit : 1  
Data bit : 7 or 8  
Parity bit : 1 (odd or even) or none  
Stop bit : 1 or 2

Communication allocation  
Communication 1 (COM PORT 1 to 2)  
RKC standard communication or MODBUS protocol  
Communication 2 (COM PORT 3 to 4)  
RKC standard communication, MODBUS protocol or  
PLC special protocol (Mapman)

Maximum connection  
RKC standard protocol, MODBUS protocol : 16 units  
PLC special protocol (Mapman) : 4 units  
Maximum connection function module  
Same function module : 16 units  
Total function module : 31 units

## CT (Current transformer) Input Module (Z-CT)

### Input

Number of inputs : 12 points  
CT type and Input range  
CTL-6-P-Z : 0.0 to 10.0A  
CTL-6-P-N : 0.0 to 30.0A  
CTL-12-S56-10L-N : 0.0 to 100.0A  
Sampling cycle : 3 sec  
Input accuracy :  
CTL-6-P-Z : ±0.3A  
CTL-6-P-N : ±2% of reading or ±1.0A  
CTL-12-S56-10L-N : ±2% of reading or ±1.0A

### Event (Alarm)

Alarm type : Heater break alarm (HBA) and Heater overcurrent alarm  
• Interlock (latch) function is configurable.  
• Alarm delay time : 0 to 255 times  
Setting method: Via communication or push-button switch  
• Automatic alarm setting function is available.  
CT allocation : Module address setting and channel setting

### Communication Function

Same as DIO module communication function

## Z-TIO, Z-DIO, Z-CT, Z-COM Common Specifications

### General Specifications

Supply voltage : 21.6 to 26.4V DC (Including supply voltage variation)  
Rating : 24V DC

Power consumption  
a) Z-TIO : Less than 140mA, Surge current : Less than 10A  
b) Z-DIO : Less than 70mA, Surge current : Less than 10A  
c) Z-CT : Less than 70mA, Surge current : Less than 10A  
d) Z-COM : Less than 30mA, Surge current : Less than 10A

### Power failure

A power failure of 4m sec or less will not affect the control action.  
• If power failure of more than 20m sec occurs, controller will  
restart with the state of HOT or COLD start. (Only Z-TIO)

### Memory backup

Backed up by non-volatile memory (FRAM)  
• Data retaining period : Approx. 10 years  
• Number of writing : Approx. 10,000,000,000 times.  
(Depending on storage and operating conditions.)

Ambient temperature : -10 to +50°C (14 to 122°F)

Ambient humidity : 5 to 95% RH (Non condensing)

• Absolute humidity : MAX.W.C 29.3g/m³ dry air at 101.3kPa

### Weight

Z-TIO  
Terminal type : Approx 130g (2ch type), Approx 160g (4ch type)  
Connector type : Approx 120g (2ch type), Approx 140g (4ch type)

### Z-DIO

Terminal type : Approx 150g (DI/DO 8ch type)  
Approx 120g (DI 8ch type)  
Approx 140g (DO 8ch type)  
Connector type : Approx 130g (DI/DO 8ch type)  
Approx 100g (DI 8ch type)  
Approx 120g (DO 8ch type)

### Z-CT

Terminal type : Approx 160g  
Connector type : Approx 140g

Z-CT: Approx 110g

### Operating environment

Free from corrosive and flammable gas and dust.

Free from external noise, vibration, shock and exposure to direct sunlight.

### Compliance with Standards

CE Mark, UL, c-UL, RCM mark

# Model and Suffix Code

|       | K 'A1 | 0 to 800.0°F        |       | J 'A1 | 0 to 800.0°F        |       |       |                     |       |       |                 |
|       | K 'A2 | 0 to 1600.0°F       |       | J 'A2 | 0 to 1600.0°F       |       |       |                     |       |       |                 |

### Output Code Table

| Output Type                     | Code |
|---------------------------------|------|
| Relay contact output            | M    |
| Voltage pulse output (0/12V DC) | V    |
| 0 to 1V DC                      | 3    |
| 0 to 5V DC                      | 4    |
| 0 to 10V DC                     | 5    |
| 1 to 5V DC                      | 6    |
| 0 to 20mA DC                    | 7    |
| 4 to 20mA DC                    | 8    |
| Triac output*                   | T    |
| Open Collector output           | D    |

\*When a triac output is specified, CE marking and UL/CSA are not applied.

### Input/Output configuration

(Heat/Cool PID control or Position proportional PID control)

#### 2ch heat/cool PID control (Z-TIO-A)

• No CH3 and CH4 for 1CH control type (Z-TIO-B).

#### 2ch position proportional PID control (Z-TIO-A)

• No CH3 and CH4 for 1CH control type (Z-TIO-B).

### RTD

| Input  | Code  | Range              |
|--------|-------|--------------------|
| Pt100  | D '35 | -200.0 to +850.0°C |
|        | D '21 | -200.0 to +200.0°C |
|        | D 'C6 | -328.0 to +752.0°F |
|        | D 'D2 | -328 to +1562°F    |
| JPt100 | P '30 | -200.0 to +640.0°C |
|        | P 'C6 | -328.0 to +752.0°F |
|        | P 'D2 | -328 to +1184°F    |

### DC Current • Voltage

0 to 20mA 7 '01

4 to 20mA 8 '01

- Quick start code 2 tells the factory to ship with each parameter preset to the values detailed as specified by the customer.
- Quick start code is not necessarily specified when ordering, unless the preset is requested.

These parameters are software selectable items and can be re-programmed in the field via the manual.

# Model Code

## Accessories

### Compact setting display unit (OP10)

#### ● Accessories

**Plug-in connector**  
(For connector type module)

Model : SRZP-02  
(2 piece)  
(Side screw type)  
Equivalent part :  
MSTB 2,5/5-STF-5,08  
PHENIX CONTACT

Model : SRZP-01  
(2 piece)  
(Front screw type)  
Equivalent part :  
FRONT-MSTB 2,5/5-STF-5,08  
PHENIX CONTACT

**Communication cables**

① Model : W-BF-01-3000 (3m)  
6 pins

③ Model :  
W-BW-03-1000 (1m)  
W-BW-03-2000 (2m)  
W-BW-03-3000 (3m)  
Spade lug terminal \*

\* Other types of cables such as cable with 9-pin D-SUB connector are also available.  
Please contact RKC.

② Model :  
W-BF-02-500 (0.5m)  
W-BF-02-1000 (1m)  
W-BF-02-3000 (3m)  
6 pins

6 pins

**Current transformer for heater break alarm (HBA)**

Model : CTL-6-P-N (0 to 30A)      Model : CTL-12-S56-10L-N (0 to 100A) (Unit : mm)

Model : CTL-6-P-Z (0 to 10A)  
[Available for Z-CT module only]  
1 (U.R.D.Co.,LTD product)

**End plates**      Model : DEP-01

To firmly fix the modules, use end plates on both sides of the mounted modules on the DIN rail.

**Front terminal cover**  
Model : KSRZ-510A

**Termination resistor connector**

Model : W-BW-01  
(For RS-485)  
Model : W-BW-02  
(For RS-422A)

DIN rail mounting socket type  
Model : ATC180041  
(Matsushita Denko product)

Rear terminal socket type  
Model : AT78051  
(Matsushita Denko product)

**Cable**

① W-BO-01-1000 (1m)  
(With termination resistor)

② W-BO-04-1000 (1m)  
(RS-485, With termination resistor)

② W-BO-05-1000 (1m)  
(RS-422A, With termination resistor)

6 pins

CT : Current transformer for heater break alarm  
Feedback resistance input is used only for monitoring.

<Caution> Voltage / current outputs are not isolated from the power supply voltage.

Screw Size : M3 X 7  
Solderless terminal is recommended

## Digital Input/Output Module (Z-DIO) Terminal type

(3) Voltage/Current

Control Output 3 (CH3)

(1) Relay contact  
(2) Voltage pulse/Voltage/  
Current/Open collector  
(3) Triac

Control Output 2 (CH2)

(1) Relay contact  
(2) Voltage pulse/Voltage/  
Current/Open collector  
(3) Triac

Measured Input 2 (CH2)

(1) Thermocouple  
(2) RTD  
(3) Voltage/Current

Control Output 4 (CH4)

(1) Relay contact  
(2) Voltage pulse/Voltage/  
Current/Open collector  
(3) Triac

Measured Input 4 (CH4)

(1) Thermocouple  
(2) RTD  
(3) Voltage/Current

Control Output 1 (CH1)

(1) Relay contact  
(2) Voltage pulse/Voltage/  
Current/Open collector  
(3) Triac

Measured Input 1 (CH1)

(1) Thermocouple  
(2) RTD  
(3) Voltage/Current

Control Output 3 (CH3)

(1) Relay contact  
(2) Voltage pulse/Voltage/  
Current/Open collector  
(3) Triac

Control Output 2 (CH2)

(1) Relay contact  
(2) Voltage pulse/Voltage/  
Current/Open collector  
(3) Triac

Measured Input 2 (CH2)

(1) Thermocouple  
(2) RTD  
(3) Voltage/Current

Control Output 4 (CH4)

(1) Relay contact  
(2) Voltage pulse/Voltage/  
Current/Open collector  
(3) Triac

Measured Input 4 (CH4)

(1) Thermocouple  
(2) RTD  
(3) Voltage/Current

Control Output 1 (CH1)

(1) Relay contact  
(2) Voltage pulse/Voltage/  
Current/Open collector  
(3) Triac

Measured Input 1 (CH1)

(1) Thermocouple  
(2) RTD  
(3) Voltage/Current

Control Output 3 (CH3)

(1) Relay contact  
(2) Voltage pulse/Voltage/  
Current/Open collector  
(3) Triac

Control Output 2 (CH2)

(1) Relay contact  
(2) Voltage pulse/Voltage/  
Current/Open collector  
(3) Triac

Measured Input 2 (CH2)

(1) Thermocouple  
(2) RTD  
(3) Voltage/Current

Control Output 4 (CH4)

(1) Relay contact  
(2) Voltage pulse/Voltage/  
Current/Open collector  
(3) Triac

Measured Input 4 (CH4)

(1) Thermocouple<br/

# External Dimensions

Temperature Control Module (Z-TIO)

Digital Input/Output Module (Z-DIO)

Current transformer (CT) Input Module (Z-CT)

Terminal Type

(Unit:mm)

Connector Type

(When installed with screws)

Communication Extension Module (Z-COM)

- Secure approximately 50 mm for the connectors and wiring, depending on the connector type

- Secure approximately 50 mm to remove the body from the base.

## Communication Converter Model Code

### ● DeviceNet communication converter (COM-JH)

| Specifications          | Model Code                        |            |
|-------------------------|-----------------------------------|------------|
|                         | COM - J                           | H - □ * 02 |
| Type                    | DeviceNet communication converter | H          |
| Connector for DeviveNet | Open connector (Unshielded type)  | N          |
| Available controller    | SRZ                               | 02         |

### ● Ethernet (Modbus/TCP) communication converter (COM-JL)

| Specifications       | Model Code                       |            |
|----------------------|----------------------------------|------------|
|                      | COM - J                          | L - □ * 02 |
| Type                 | Ethernet communication converter | L          |
| Communication type   | Modbus/TCP                       | 1          |
| Available controller | SRZ                              | 02         |

### ● CC-Link communication converter (COM-JC)

| Specifications           | Model Code                             |            |
|--------------------------|--|------------|
|                          | COM - J                                | C * 02 - □ |
| Type                     | CC-Link communication converter        | C          |
| Available controller     | SRZ                                    | 02         |
| RUN/STOP logic selection | 0 : RUN, 1 : STOP<br>0 : STOP, 1 : RUN | 1<br>2     |

### ● Ethernet (Ethernet/IP) communication converter (COM-ML)

| Specifications              | Model Code                       |              |
|-----------------------------|----------------------------------|--------------|
|                             | COM - M                          | L - 2 □ * 02 |
| Type                        | Ethernet communication converter | L            |
| Ethernet communication type | Ethernet/IP                      | 2            |
| Host communication type     | RS-422A                          | 4            |
|                             | RS-485                           | 5            |
| Available controller        | SRZ                              | 02           |

### ● MECHATROLINK communication converter (COM-MY)

| Specifications          | Model Code                           |            |
|-------------------------|--------------------------------------|------------|
|                         | COM - M                              | Y - □ * 02 |
| Type                    | MECHATROLINK communication converter | Y          |
| Host communication type | RS-422A<br>RS-485                    | 4<br>5     |
| Available controller    | SRZ                                  | 02         |

### ● USB communication converter (COM-K2)

| Specifications             | Model Code                              |        |
|----------------------------|---|--------|
|                            | COM - K2 -                              | □      |
| Loader communication cable | None<br>With loader communication cable | 1<br>N |

- Safety Warning**
- Before operating this product, read the instruction manual carefully to avoid incorrect operation.
  - This product is intended for use with industrial machines, test and measuring equipment. It is not designed for use with medical equipment.
  - If it is possible that an accident may occur as a result of the failure of the product or some other abnormality, an appropriate independent protection device must be installed.

| Caution for the export trade  |
|---|
| All transactions must comply with laws, regulations, and treaties.  |
| Caution for imitated products   |
| As products imitating our product now appear on the market, be careful that you don't purchase these imitated products. We will not warrant such products nor bear the responsibility for any damage and/or accident caused by their use. |
