

Series Q32 Liquid Level Gauges

Series Q32 Liquid Level Gauges are high pressure liquid level gauges with pressure ratings up to 4000 PSI @ 100 F°. Series Q32 liquid level gauges are available in both reflex and transparent application. These gauges are designed with a heavy duty chamber machined out of solid bar stock, complete with sectional gauge covers and gauge glasses. These gauges are assembled with special bolts and nuts that compliment the service level of the gauge. The pressure rating shown in the tables is for the standard non-asbestos or grafoil and carbon steel chamber, as well as the stainless steel series 300 or 300L. The pressure is only 50% for Kel-F shields and pure gaskets. Lower temperature applications are possible with the variation in metallic material. Construction of 316 stainless steel with grafoil gaskets are rated to -326F°

Series Q32 Gauge Specifications

Lengths

Series Q32 gauges are available in nine standard visible glass lengths. Multiples of the same size windows (up to nine sections) in a single piece bar stock liquid chamber are used for longer lengths.

Connections

Standard Series Q32 Gauges are furnished with 1/2 or 3/4 inch NPT female end connections. Other connections available: 1/2 or 3/4 inch NPT female or male, side or back, flanged ends, side or back to suit mating connections.

Liquid Chambers

Machined from bar stock with recessed gasket seats.

Covers

All covers are manufactured to be interchangeable.

Bolt & Nuts

Alloy steel to ASTM Standards.

Glass

The tempered glass must be protected from corrosive substances such as caustic acid and hydrofluoric acid. Only transparent glass with mica or Kel-f shields must be used in these applications.

Gaskets

Precision die cut from the highest quality materials.

Protection

All carbon steel parts are coated both externally and internally with a high quality rust inhibitor. This coating serves as a superior bonding base for paint. It is recommended that all Q32 Gauges be installed with Quality Gauge Valves, having safety ball checks, which help provide protection against physical injury and loss of product should glass breakage occur.
